- Moisture absorber on top to prevent goggles from fogging
- FFP3: Enhanced inner lining for better fit and two extra-wide and adjustable rubber bands

GENERAL INFORMATION

DUST MASKS according to EN 149 are suitable for filtration of breathing air containing solid, liquid and aerosol media. Please refer to your given local laws for the right breathing protection.

Masks according to EN 149 are classified in 3 classes depending on the ability to separate airborne particles according to the FFP (Filtering Face Pieces).

TECHNICAL INFORMATION

Class Separation ability (at 95 L/min airflow) / Allowed leakage between mask and face:
 FFP1 Filter separates 80% of airborne particles / < 22%
 FFP2 Filter separates 94% of airborne particles / < 8%

FFP3 Filter separates 99% of airborne particles / < 2 %

Specification FFP1 and FFP2: According to EN 149:2009
 Specification FFP3: According to EN 149:2001

APPLICATION AND USE

- Dust Masks classifies FFP1-3 are widely used in the fields of painting and lacquering trades, welding & clean-up, sanding & grinding applications and construction sites where dust and dirt pollute the working environment and threaten workers safety.
