## PUR FOAM CLEANER

### General Information

PUR FOAM CLEANER is a cleaning spray for removing uncured construction foam from tools, clothing and surfaces. Due to its special formulation PUR FOAM CLEANER can also be used

to clean the inside and outside of foam gun from unhardened construction foam. PUR FOAM CLEANER cleans window frames, window sills, doors, jambs, etc. from uncured construction foam.

### Technical Information

Form: aerosol  
Colour: colourless  
Solvent: acetone  
Propellant: dimethyl ether  
Boiling point at atmospheric pressure: -25°C  
Vapour pressure (at 50°C): < 300000 Pa (300 kPa)

Density (at 20°C): 736 kg/m<sup>3</sup>  
pH-value: 7 - 7,4  
Autoignition temperature: 240°C  
Application temperature: -10°C - +30°C  
Shelf life: 12 months in unopened packaging  
Storage: cool and dry at temperatures between 5°C and 30°C

### Application and Use

- Application temperature: -10°C - +30°C.
- Application method: Use the spray nozzle on the container to remove foam from clothing and surfaces. To clean the foam gun from the inside, connect the container of cleaning agent to the gun by holding the gun handle with one hand and rotating the upright container with the other hand. Make sure that the gun is not pointing in the direction of other people when turning it.
- Only after connecting, turn the container together with the gun into the working position, i.e. upside down. Shake the container and clean the gun by pressing the trigger until the escaping cleaning agent no longer contains foam. Handle with special care as the cleaner contains flammable gas. Not suitable for removing cured foam.
- Cleaning: Cover with inert absorbent (e.g. sand). Collect and place in a suitable container or allow to evaporate.
