Eye/face protection:

Tight-fitting safety goggles

Skin protection:

Hand protection: The glove material must be impermeable and resistant to the product / substance / preparation.

Selection of the glove material considering the breakthrough times, permeation rates and degradation.

Glove material: NBR (Nitrile rubber), Butyl caoutchouc (butyl rubber), CR (polychloroprene, chloroprene rubber); Chemical resistant protective gloves (EN ISO 374).

Recommended material thickness: 0,5 mm, Breakthrough time: 480 min, The exact breakthrough time must be obtained from the protective glove manufacturer and must be observed.

The determined breakthrough times according to EN 16523-1 were not carried out under practical conditions. A maximum wearing time corresponding to 50% of the breakthrough time is recommended.

Hand protection cream recommended. The selection of a suitable glove depends not only on the material but also on other quality features and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of glove materials cannot be calculated in advance and must therefore be checked before use.

Respiratory protection:

Not required.

Other protection measures:

General protective and hygienic measures: Wash hands before breaks and after work.
